

WIRELESS SECURITY CAMERAS

Law Enforcement Guide

©

TechnologyResourceGuide@gmail.com

Common Features:

- Inexpensive
- Easy setup
- Expandable
- Cloud storage
- Two-way audio
- Night / Day viewable
- Removable storage media – *LOOK FOR MICROSD CARDS*
- Live viewing, recorded events, notifications, etc.
- Mobile App access and control – *LOOK FOR ASSOCIATED APPS ON MOBILE DEVICES*

Cameras are connected to the user's Wi-Fi network.

Data is typically NOT stored inside the device itself, but may be stored on removable media such as an SD or MicroSD card. Data may be stored on device manufacture's cloud storage service. Content and device details are most commonly stored by the service provider for at least a week.

Live and historical content can usually be viewed on the users associated mobile app.

Providers typically need the device serial number, registered users name, e-mail, and telephone number, and the address where the device was registered. With these details the provider should be able to identify the target account and devices and act on a preservation request and emergency disclosure request. Consider obtaining signed consent from the registered device owner.

Guidelines](#)

ring VIDEO
DOORBELL

IMPORTANT: Ring requires valid legal process in order to produce information on an account. A search warrant (*or verification of the account owner and their consent*) is required in order to produce videos. Ring only stores videos if the user subscribes to a storage plan, and Ring's storage plan generally retains videos for up to 60 days unless a user deletes a video sooner. Ideally, any legal process should include the MAC ID for the device, which is the best way to identify the correct account. The MAC ID is located on the back of the device or on the box. If you don't have access to the MAC ID, we may be able to search by a combination of name, address, telephone number and/or email address. A warrant should also include the date(s), time(s) and time zone of the requested video(s).

IMPORTANT: Law enforcement requests for Nest Cam should be submitted through the Google Law Enforcement Request System (LERS) at lers.google.com. LERS features a saved personal account for submissions, a status dashboard to track the progress of your legal request and, once we have completed processing your request, you will be able to download the production directly from your account. To create an account, visit lers.google.com. Legal process must be addressed to Nest Labs, Inc. Do not send duplicate copies by physical mail, as this may increase the time to process your request.
